

## 45" FIBERGLASS UNIVERSAL PIPING SUMPS

Petroleum Containment's Universal Piping Sumps makes ordering & stocking simpler than ever, by providing 1 sump that works for all single STP applications.

### FEATURES:

- **Universal Base-** A rigid 12-sided sump base that can be used on a 42" UST collar, a manway, or a bung adapter. Smooth flat panels are easy to drill and provide leak-tight sealing surface for penetration fittings.
- **Adjustable Upper Body-** A large adjustable top provides **28" of height adjustability** to work in both shallow burial as well as deep burial applications, with only 1 simple field determined cut.
- **Twist-lok Access Cover** - The latest generation of PCI's patented "Twist-Lok" Access Covers provide a truly water-tight seal with a quick and easy 18 degree turn.
- **4" Inspection Port** - Optional inspection port allows quick inspection without removing the entire access cover.
- **Two-Part Design with Epoxy Bonding Trough** - Makes installations simpler than ever. Installers have plenty of room to install the equipment in the base before the upper body is attached. Then, one simple epoxy pour guarantees a water-tight bond.
- **UL Listed Isophthalic Fiberglass Materials** - Provide a rigid construction that prevents deforming due to backfill. Fiberglass can be easily repaired in the field by qualified technicians if drilled incorrectly or damaged by construction equipment.
- **Factory Prepped** - All PCI sumps can be prepared at the factory to save installers time and money.
