

48" FIBERGLASS

UST PIPING SUMPS

Petroleum Containment's 48" UST Piping Sumps are some of the largest piping sumps in the industry. Designed to accommodate dual STP systems for all types of installations including collar mount, bung mount, and manways. A patented "Twist-Lok" Access Cover provides quick and easy access while ensuring a watertight seal every time.

Features:

- **Large 27" Tall Rigid Base**- Three different bases are available including, collar mount, solid bottom, and a universal bottom which works for all three types of installations such as 42" and 48" collar mounts, bung mount, and manways. Smooth flat panels provide leak-tight pipe entries.
- **Adjustable Height** - Two different styles are available depending on burial depth. Low Burial sumps work for installations requiring a height from 43" to 60" and Deep Burial sumps work for 61" to 88". Both styles are easily adjusted in the field using an epoxy pour to guarantee a water-tight bond.
- **Twist-lok Access Cover** – The latest generation of PCI's patented "Twist-Lok" Access Covers provides a truly water-tight seal with a quick and easy 15 degree turn.
- **4" Inspection Port** – Optional inspection port allows quick inspection without removing the entire access cover.
- **UL Listed Isophthalic Fiberglass Materials** - Provides a rigid construction that prevents deforming due to backfill. Fiberglass can be easily repaired in the field by qualified technicians if drilled incorrectly or damaged by construction equipment.
- **Smooth White Finish** – Reflects light better, making it brighter inside the sump for better installations and inspections.
- **Factory Prepped** - All PCI sumps can be prepared at the factory to save installers time and money.

Low Burial Models (43" to 60")
 PC48LBB – Solid Bottom
 PC48LBC – Collar Mount
 PC48LBU – Universal Base

Deep Burial Models (61" to 88"):
 PC48DBB – Solid Bottom
 PC48DBC – Collar Mount
 PC48DBU – Universal Base
