

FUTURE PROOF YOUR FORECOURT WITH PCI'S EV EXPANSION BOXES

Prepare your site for future EV charging before the concrete is poured. PCI EV Expansion Boxes let you plan for charger installation today, even if charging equipment comes later.

Built with a 100% fiberglass body and a rain-tight steel top, these boxes combine corrosion resistance with flexible configuration options.

UNIVERSAL BOX

The 12"x12" universal box is designed to fit most all chargers.

INTERCHANGEABLE STEEL TOPS

The universal box has interchangeable top options to fit the footprint of whatever charger you install.

100% FIBERGLASS CONSTRUCTION

100% high quality, non-corrosive fiberglass provides long-term reliable containment without voiding warranty, warping, cracking or becoming brittle.

WATER-TIGHT OPTIONS

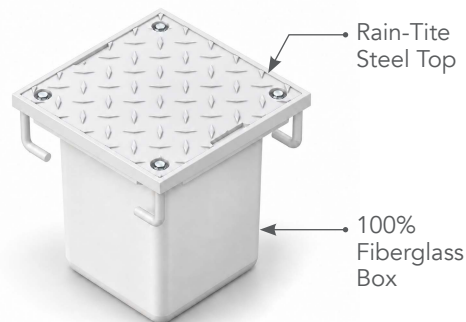

EV Expansion boxes are available with open bottoms or with water-tight closed bottoms.

ADDITIONAL MODELS AVAILABLE
